

The OTS-40 lock offers a zero-maintenance, batteryless solution

Ojmar has unveiled the world's first batteryless smart locker lock with integrated online management, says Aitor Elorza

After setting a new benchmark with the OTS20 Batteryless, Ojmar has taken innovation to the next level with the launch of the OTS40 – the first-ever RFID + NFC locker lock that's batteryless, wire-free and fully connected.

This solution redefines space management, blending sustainability, technology and operational efficiency.

At the heart of the OTS40 lies Ojmar's Push Power system. When the user pushes the nozzle, the lock generates its own energy, removing the need for batteries or wiring. The OTS40 allows real-time locker management via a centralised platform, reducing installation and maintenance costs and eliminating kilometres of cabling.

For facility managers, this means a zero-maintenance solution that streamlines operations, reducing technical issues and freeing resources for higher-value tasks – all while shrinking the organisation's carbon footprint.

Its integration with existing access control systems makes it the perfect fit for health clubs and wellness operators, such as spas. Plus, it works with smartphones and RFID credentials (bracelets, cards and fobs), delivering a frictionless user experience.

The OTS40 Batteryless embodies Ojmar's DNA – delivering constant innovation to meet the evolving needs of a changing market.

Designed for present and future

As the fitness and wellness industry embraces flexibility and digital transformation, the OTS40 Batteryless delivers the perfect combination of innovation, sustainability and convenience. Its remote management capabilities allow operators to optimise locker availability, streamline operations and offer a seamless user experience. Whether managing high traffic during peak hours or adapting to evolving

customer needs, the OTS40 ensures the facility remains efficient, secure and future-ready.

The OTS40 Batteryless has earned international acclaim, receiving prestigious awards that include: Mix Interiors Awards, Best of NeoCon, Best of Orgatec and most recently the iF Design Award 2025.

The product triumphed over nearly 11,000 entries from 66 countries, reinforcing Ojmar's position as a global leader in innovation and sustainability for intelligent locking systems.
